

# Socazolimab — Injection

## Product name

Generic name: Socazolimab Injection

Chinese pronunciation: Suokazuoli Dankang Zhusheyeye

## Ingredient

Active ingredient: Socazolimab, a humanized immunoglobulin G1 (IgG1) monoclonal antibody targeting programmed death ligand 1 (PD-L1).

Excipients: Histidine Hydrochloride, Histidine, Trehalose, and Tween 20 (for injection).

## Description

Colorless to pale yellow liquid, may have a slight opalescence.

## Indication

Socazolimab is indicated to patients with recurrent or metastatic cervical cancer who have failed or cannot tolerate first-line platinum-containing regimens.

## Strength

100 mg (4 ml) / Vial

## Dosage and administration

Treatment with Socazolimab should be used by specialist physicians with experience in tumor treatment.

## Posology

The recommended dose is 5 mg/kg, intravenous infusion once every 2 weeks until disease progression or intolerable toxicity.
